Github: <https://github.com/TheCoaxial>

Full-stack web developer leveraging my teamwork and problem solving skills from a maintenance background to help build a more intuitive and functional website experience. Known for my ability to quickly internalize and apply new concepts, I have a strong focus on mobile first design and development. With each project I aim to better my implementation of new technologies to deliver a great user experience while remaining performant. I worked on a team of four to develop a single-page MERN app that allowed users to share recipes centered around fermentation, favorite said recipes, follow other users, search for recipes/users and more. I'm excited to leverage my skills as part of a fast-paced, quality-driven team to build better experiences on the web.

TECHNICAL SKILLS

Languages: JavaScript ES5/ES6, CSS, HTML5, SQL

Applications: GitHub, MongoDB, MySQL

Tools: Express, React, Node, JQuery, Bootstrap

PROJECTS

Fun With Fermentation | <https://github.com/TheCoaxial/Final-Project> | <https://salty-dawn-64372.herokuapp.com/>

- Summary: A recipe sharing site with social media features for fermentation enthusiasts.
- Role: Authentication and front end JS
- Tools: React, Express, MySQL, Sequelize, Material-UI, Node, react-router-dom, react-social, jsonwebtoken, local-storage

Fantasy Soccer App | <https://github.com/mdurst365/Project2> | <https://project2sports.herokuapp.com/login>
